# Quick Reference Guide: Narrator for Windows 10 Keys & Touch Commands

*Recommended browser: Microsoft Edge*

## Getting Started

**Narrator key:** By default, either Caps Lock or Insert can be used as the Narrator key. This guide refers to it as Caps Lock.

**Narrator Views:** Narrator has several navigation settings, called views. View types include items (default), characters, words, lines, paragraphs, headings, links, tables, and landmarks. Change view type using Caps Lock + Page Up or Caps Lock + Page Down (or Caps Lock + Control + Up Arrow or Caps Lock + Control + Down Arrow).

**Scan mode:** Scan mode allows quick navigation of a web page or application and enables specific keystrokes to navigate by elements such as headings, links, and landmarks. It also includes keystrokes for table navigation. Activate scan mode using Caps Lock + Space Bar.

**Developer mode:** Developer mode masks the screen, highlighting only the objects and text exposed programmatically to Narrator. This offers a visual representation of the accessibility of the information on the screen and what is exposed to Narrator through UI Automation.

## The Basics

| Task | Command |
|------|---------|
| Turn Narrator on and off | Windows logo + Control + Enter (or Caps Lock + Escape to turn off) |
| Stop reading | Control |
| Start reading continuously from this point on | Caps Lock + Down Arrow or Caps Lock + Control + R |

| Read what's under your finger | Touch or drag a single finger |
| Activate primary action | Double tap |
| Activate secondary action | Triple tap |
| Quick double (or triple) tap | Hold with one finger, tap (or double tap) anywhere with another |
| Next or previous item | Flick right or left |
| Change view | Flick up or down |
| Stop reading | Two-finger tap |
| Change verbosity | Three-finger tap |
| Show commands for current item | Four-finger tap |
| Show context menu | Two-finger double tap |
| Read text attributes | Three-finger double tap |
| Open search mode | Four-finger double tap |
| Show all Narrator commands | Four-finger triple tap |
| Scroll | Two-finger swipe up, down, left, or right |
| Tab forward or backward | Three-finger swipe right or left |
| Read current window | Three-finger swipe up |
| Start reading on explorable text** | Three-finger swipe down |
| Enable (disable) semantic zoom | Four-finger swipe up (down) |
| Move Narrator cursor to beginning or end of unit | Four-finger swipe left or right |

*Scan mode only

**Although using this gesture will act similarly to the keyboard command to "Start reading continuously from this point on," the difference is that when you use this gesture and then use the keyboard command or gesture to "Stop reading," the focus remains where the reading began, instead of moving to where the reading was stopped.
